SUCCESS STORY

Customer

Name: **VST-Works Oy**

Industry: **Mould Making**

ALWA MOULD D

enables
a regulated
temperature
control

BUSINESS FIELD

VST-works (www.vst-works.com) create patterns, moulds, production tools, prototypes and 3 D images for a diverse clientele.

CHALLENGE

VST-works got the order to build a boat mould of 1200 litres, which should be characterized by an outstanding surface quality and an elegant shape.

SOLUTION AND ADVANTAGES

VST-works used **ALWA MOULD D**, which ensures a temperature control (copper pipes) over the whole mould. During production, the sheet covers evenly the mould, especially at the edges.

ALWA MOULD D
vacuum mould.

The GRP pattern is treated with ALWA RELEASE LACQUER.
